

HKAVE 2016 SHOW REPORT

Organized by HiFi Review Magazine, Hong Kong's high prestige High End Audio Magazine, coincidentally 2016 celebrate its 30th Anniversary and Feversound Com, most popular Hong Kong based web magazine , HKAV Show was taken place from June 10 to 12 at Regal Kowloon Hotel. It was first step HKAV show consolidating and focusing on the quality high end audio. The show seems unthinkably attracted music lovers and audiophile and end with the great success. It's not official report but I guess near or more than 8,000 visitors made hotel floor very clouded from first day until last minute of closing time.

It's amazed to learn that a quite big number of brochures and relative leaflets we shipped have gone in fewer hours on first day thus when I arrived on 10th, none of materials left behind for my use for the presentation.

In Hong Kong, there is another show organized by Audio-technique holding annually on every August at the Trade Center. For some reasons, Sound Concepts our Hong Kong/China distributor did not participate probably for closest to 10 years. During this long period of absence by Sound Concepts, many music lovers had been missing the opportunity in sharing with

Sound Concepts and our products;
HARMONIX, REIMYO.

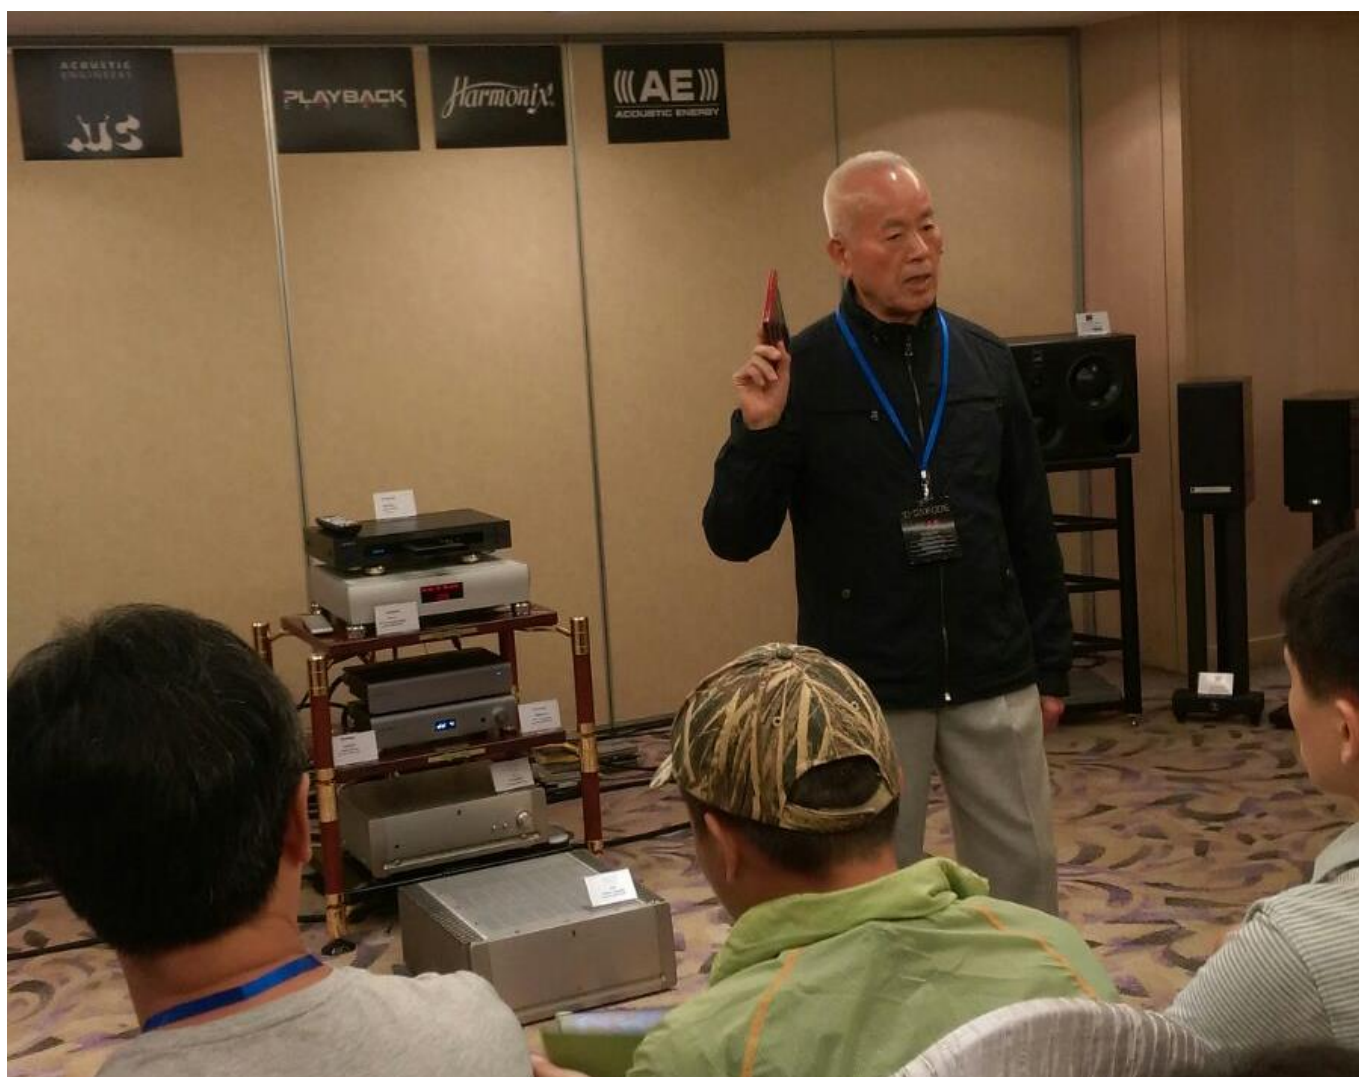

Many visitors passing by and visited Sound Concepts room were excited and very welcome us back to the show. Last day of the show, I have scheduled out to do the presentation for our loyal customers and music lovers on subjecting on Importance for

The Best Sound Reproduction and first from 12:00 for music soft, from 14:00 for Indispensable system Tuning and last from 16:00 for Reimyo electronics specifically about KAP-777 and DAP-999EX Ltd.

I can see every one of visitors are very satisfied with the opportunity and environment the Show at Regal Kowloon Hotel and they are looking forward to meet us again.

Mr. HiFi Review and Feversound.com to include every one of Exhibitors, I thank you all for the fantastic opportunity you have created and make the show excitingly heat up.

Expecting this show to grow even better, highly recognized and sophisticated high end show for music lover.
