

Munich Hifideluxe show report

High End Show 2016 and Hifideluxe Show have been over on May 9 with success.

Official announcement may shortly be released but it's very sure the show again marks new record of success. The number of exhibitors shift 366 of 2015 up to nearly 400 or more in 2016 it became bigger and larger ever. The reason for the shift was due to increase number of exhibitors more from USA, China, Taiwan and other countries this year. High End show is becoming seemingly more Consumer Electronics show in Europe rather not high End Audio show. This change may disappoints serious audio traders and music lovers those of who seek for the quality audio, also for those of manufacturers such like us aim for the delicate and attributed pure high quality Audio.

The scale of the show goes bigger, the space availability and room allocation for exhibitors has

become limited and difficult to get and keep the room that exhibitors need.

For this particular reason, we have for first time joined in Hifideluxe show organizing by group of high end audio distributors and manufacturers. Hifideluxe show was taken place almost the same time frame as High End Show in M. O. C. from May 5 to 7 at Marriott Hotel Munich located near to M.O.C.

The scale of Hifideluxe show is so much smaller in compared with High End Show in M.O.C. but environment of Marriott Hotel offer is so much better for serious music listeners in the perfect listening condition providing listeners with quiet, clean and fresh air. It assure 100 percent of music lovers and audio traders visited Hifideluxe can comfortably be enjoyed and satisfied the show in such environment in Marriott Hotel provided.

An exceptionally success of our show at Hifideluxe this year was due to, not only because of

environment but also timeless effort contributed by Ed of DALUSO, Exhibitor and distributor in Netherlands, Germany and Austria. He arranged system sept up in very professional manner with all Harmonix, Reimyo, Hijiri including XRCD music soft for demo. His timeless care would have captured the highest attention from visitors.

We are very proud of being known by words of compliment by everyone of visitors they said, among nearly or over 400 exhibitors, the sound of the systems we presented is exceptional and professional, admired that our systems is only one that bring out BEST sound and TRUE TO MUSIC sound reproduction among exhibitors demonstrating under the roof of High End show at M.O.C and Hifideluxe show at Marriott Hotel while the rest were sounding just loud and fuzzy, not musical at all.

Most of visitors stay long and really enjoy and satisfied with the sound of system by way in listening to music as they swing their body, tapping their feet along with music we played.

Then, when they are about to leave the room they thumb up and saying Best sound of the show, " very good", "Excellent" or "Congratulations" in the best compliments.

Every visitors seems to get shock and surprised by the sound of ENCORE, such a small size bookshelf type studio monitor speakers, bring out fabulous musicality and perfect tonal balance in compared with 10 to 20 times bigger and expensive speaker systems they have listened in other booths.

On May 8, last day of High End show, I visited at M.O.C. and listened around to the demonstration of known brands systems as much time allowed but as was told by visitors, the system was just loud and too much bass with no sense of musicality but be aware that is becoming just a common among exhibitors in high end audio marketplaces around the world.

hifideluxe munich2016
